

Architecture in Support of Business Operations

Dennis E. Wisnosky

DOD Business Mission Area

Chief Technical Officer/Chief Architect

within the Office of the

Deputy Chief Management Officer

June 3rd, 2009

Enterprise Architecture

▶ To Understand

- Analyze what already exists
- Assess what will be
- Main purpose: People Integration/Conversation

▶ To Build

- Design what will be within today's constraints
- Set objectives and constraints for detailed specifications
- Main purpose: Instruct/Guide

▶ To Verify

- Provide a framework for others
- Evaluate current practice against existing guidelines
- Main purpose: Compliance/Control

Ability to Communicate

**Enterprise Architecture is primarily about
People talking to each other...**

Ability to Communicate

**...so we can build
Systems and Services that talk to each other**

Let's go live!

Agile, Adaptive Organization

"To Be"

How can we do this?

Today's Reality

▶ Many Frameworks

▶ Many Views

There must be standard formats for diagrams, and for data that represents the diagrams, and for data that moves within and between the reality that diagrams represent.

Many Techniques

- IDEF, UML, BPMN, RAD, FPC, PowerPoint and many, many others...

We get there thru primitives!

Primitives

Standard Symbols

Engineering Language and Symbols:

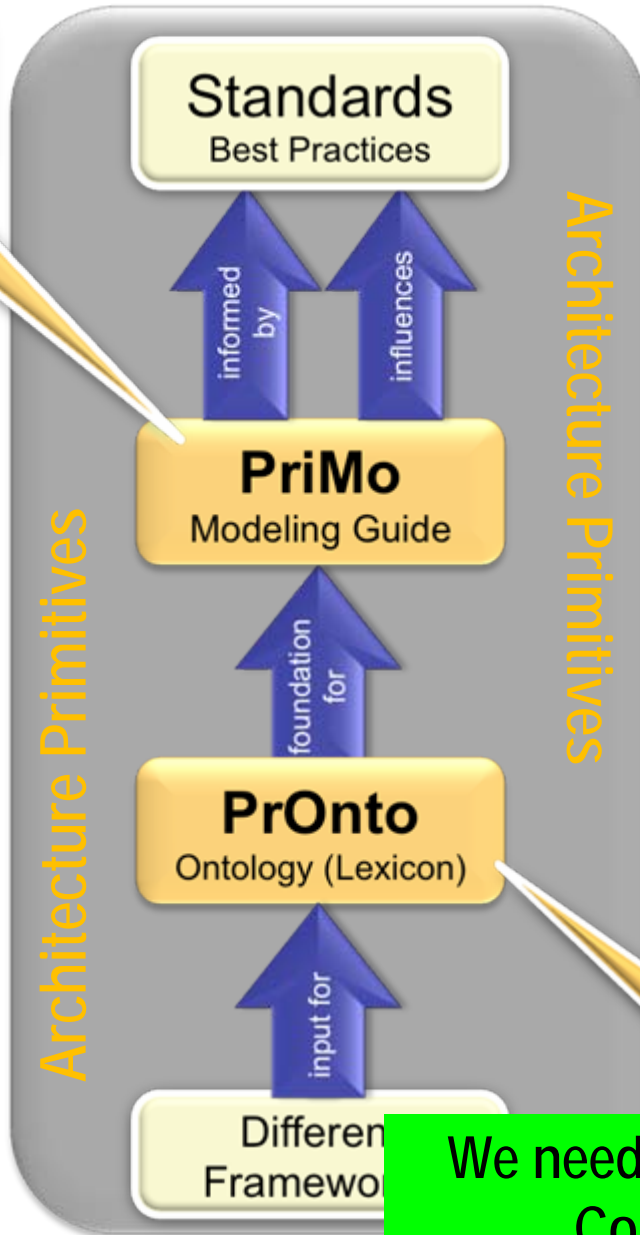

Resistor symbol

Capacitor symbol

This agreed upon representation of electrical engineering allows a common understanding...

- DoDAF 2.0 serves as the foundation for architecture primitives
- Use Cases being developed and used to drive pilots

Music Language and Symbols:

Music Scale symbols

Notes symbols

This agreed upon representation of music allows a common understanding...

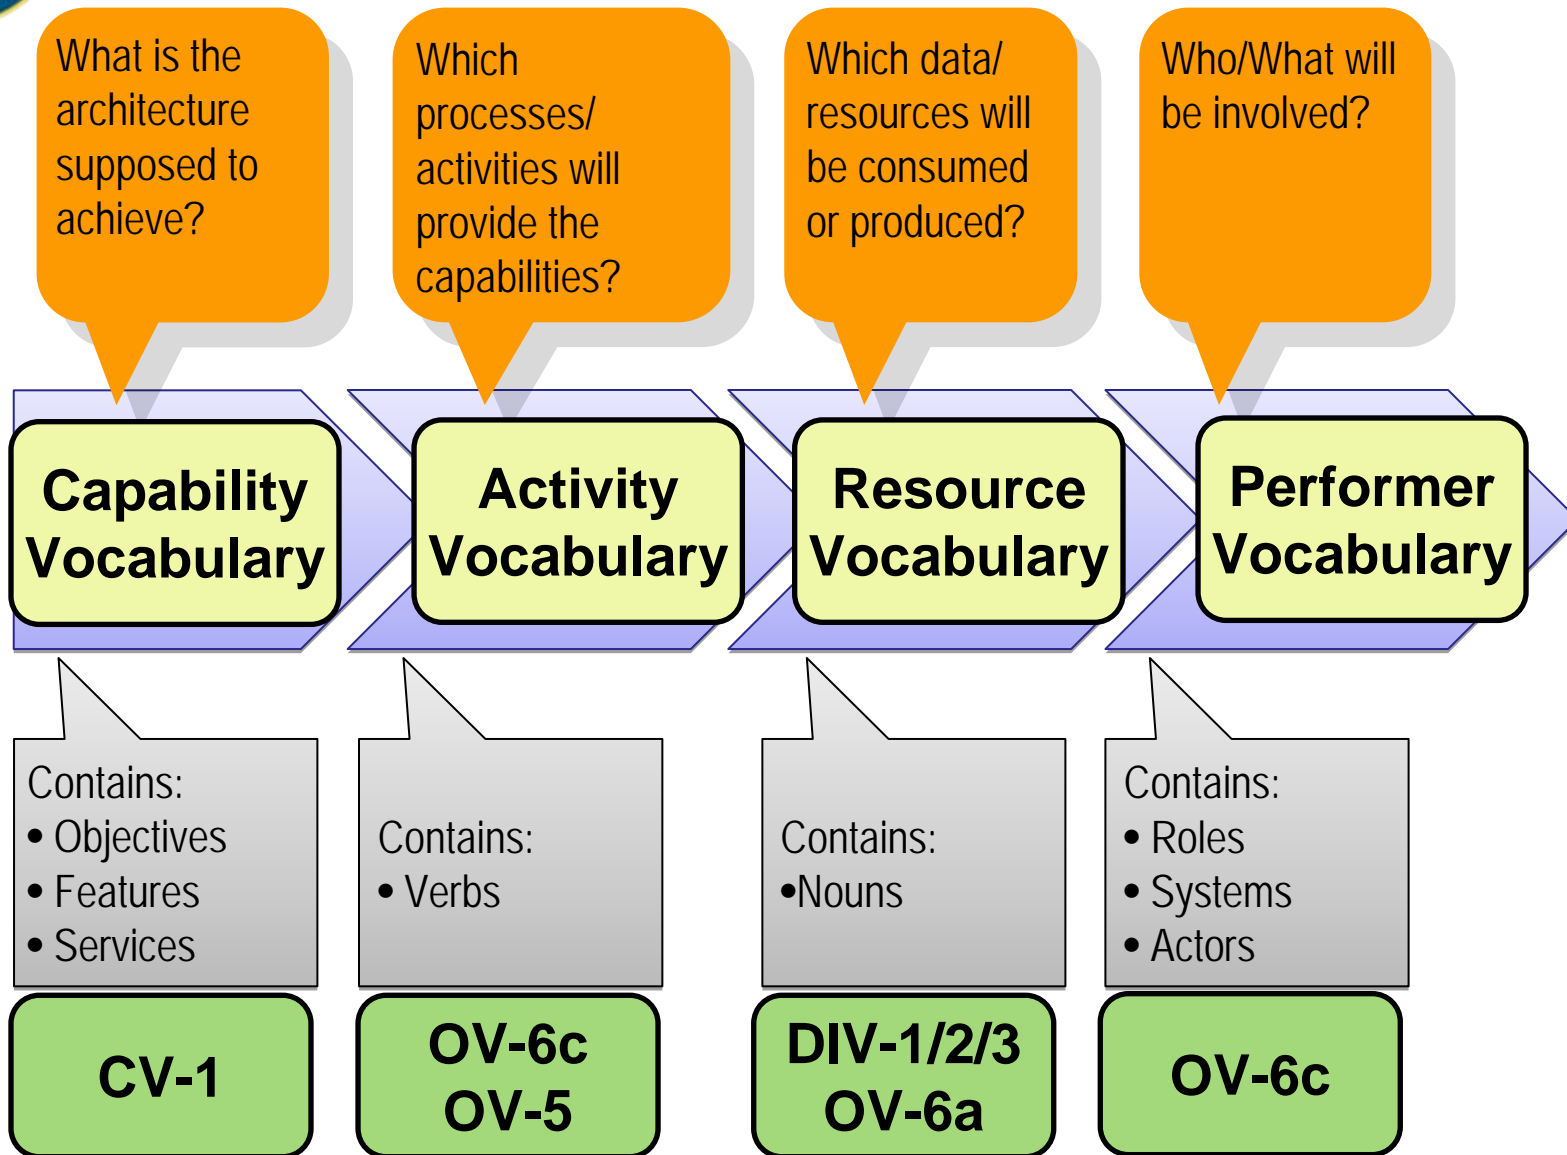

Standard Language

We need a discipline supported by Common Vocabularies!

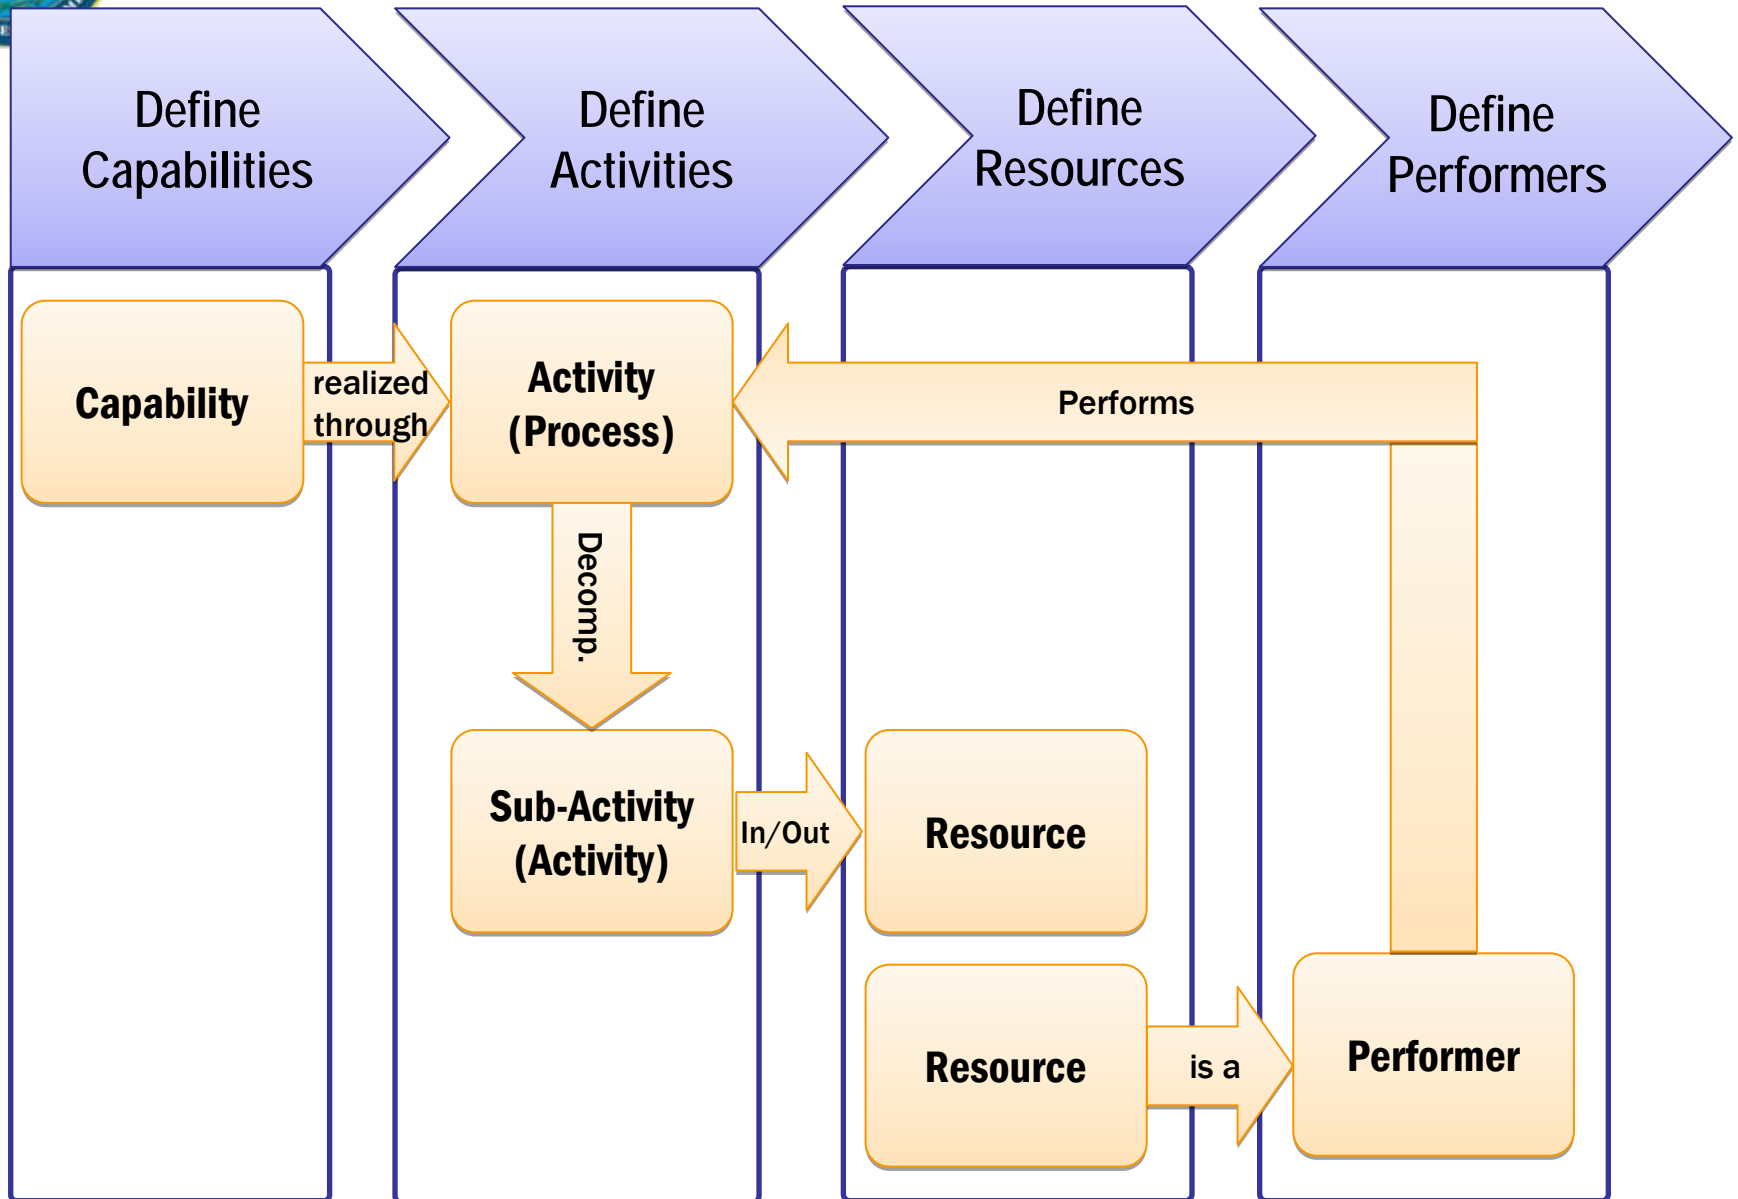

Our Architecture Discipline

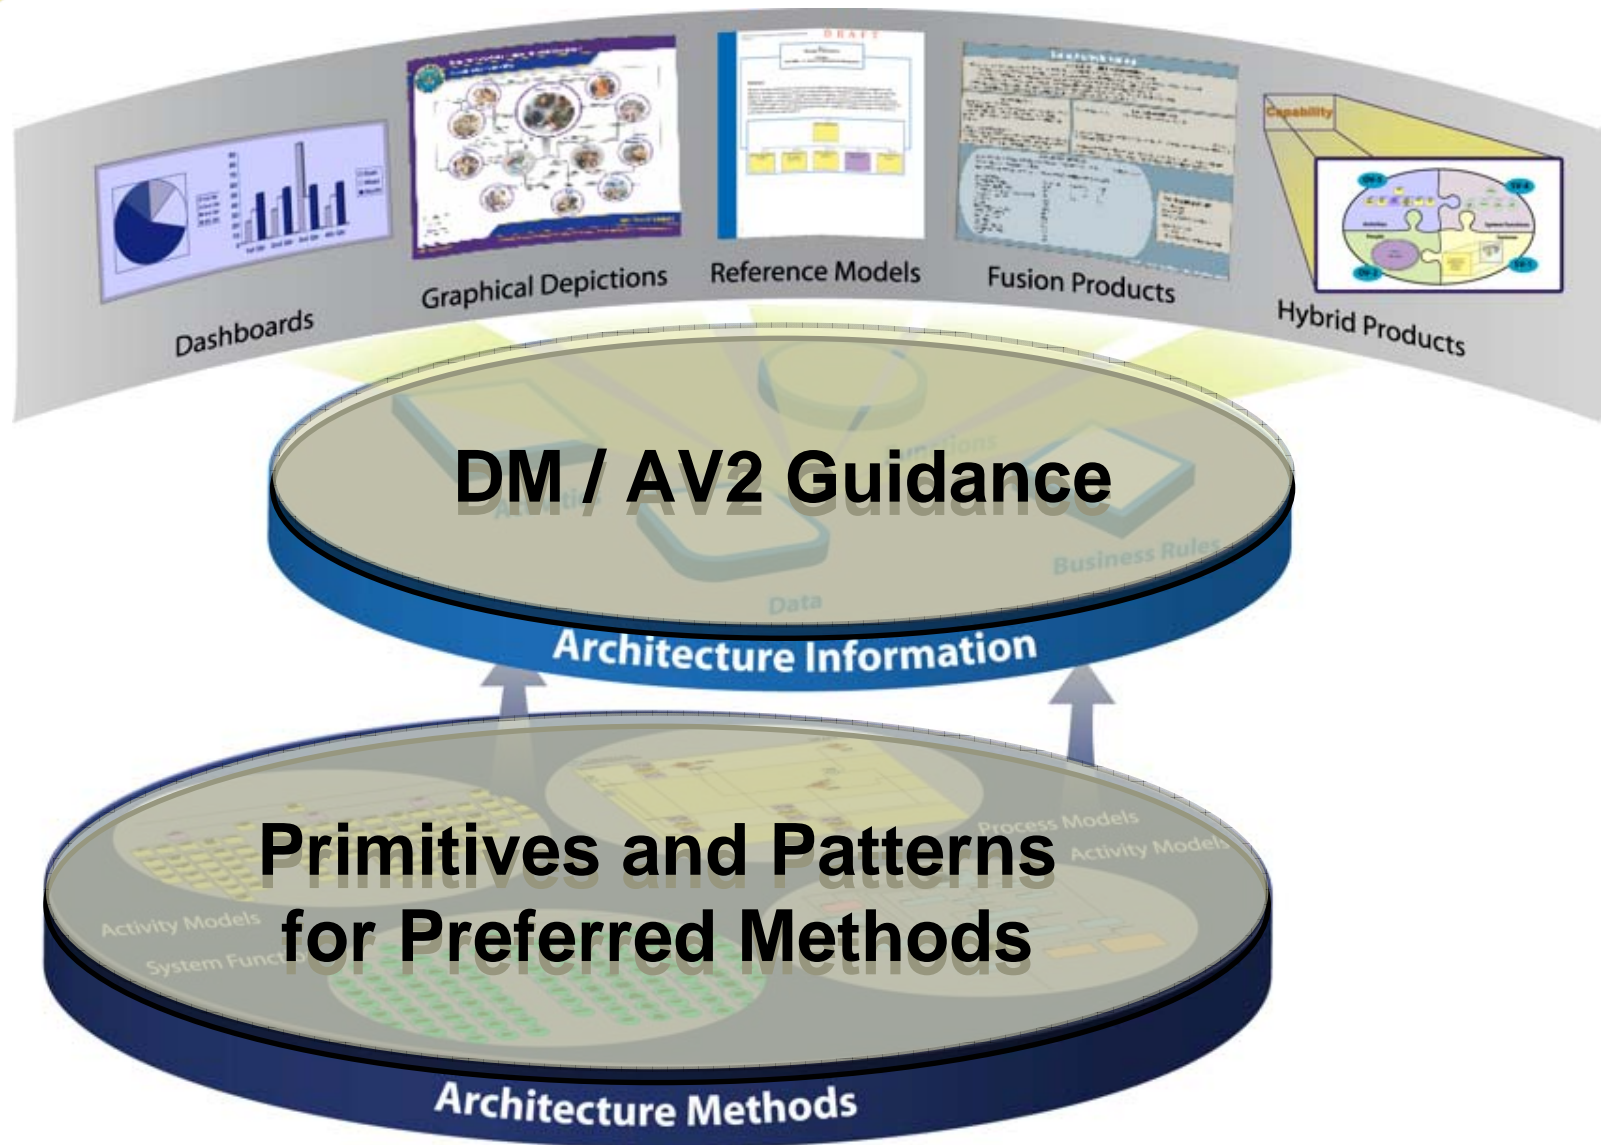

Relationships Among the Terms

Alignment with DoDAF v2.0

Current EA Building Practice

Engineering vs. Architecture

► If you show the same circuit diagram to two electrical engineers they will be able to understand the diagram because

- The symbols are drawn the same way everywhere
- The symbols have a well-defined meaning (semantics)
- All electrical engineers are trained on the same set of symbols

Resistor symbol

Capacitor symbol

This agreed upon representation of electrical engineering allows a common understanding...

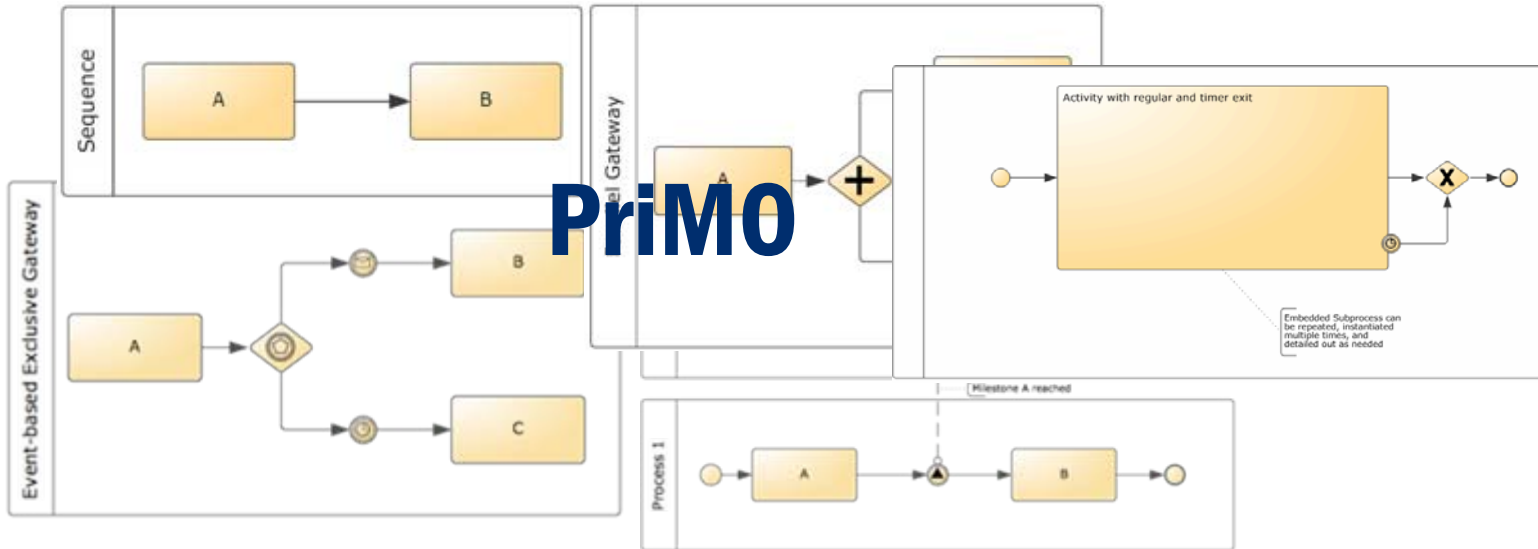

Solution:

Primitives + Patterns + Style Guide

Solution: Primitives & Patterns

PrOnto – Vocabulary

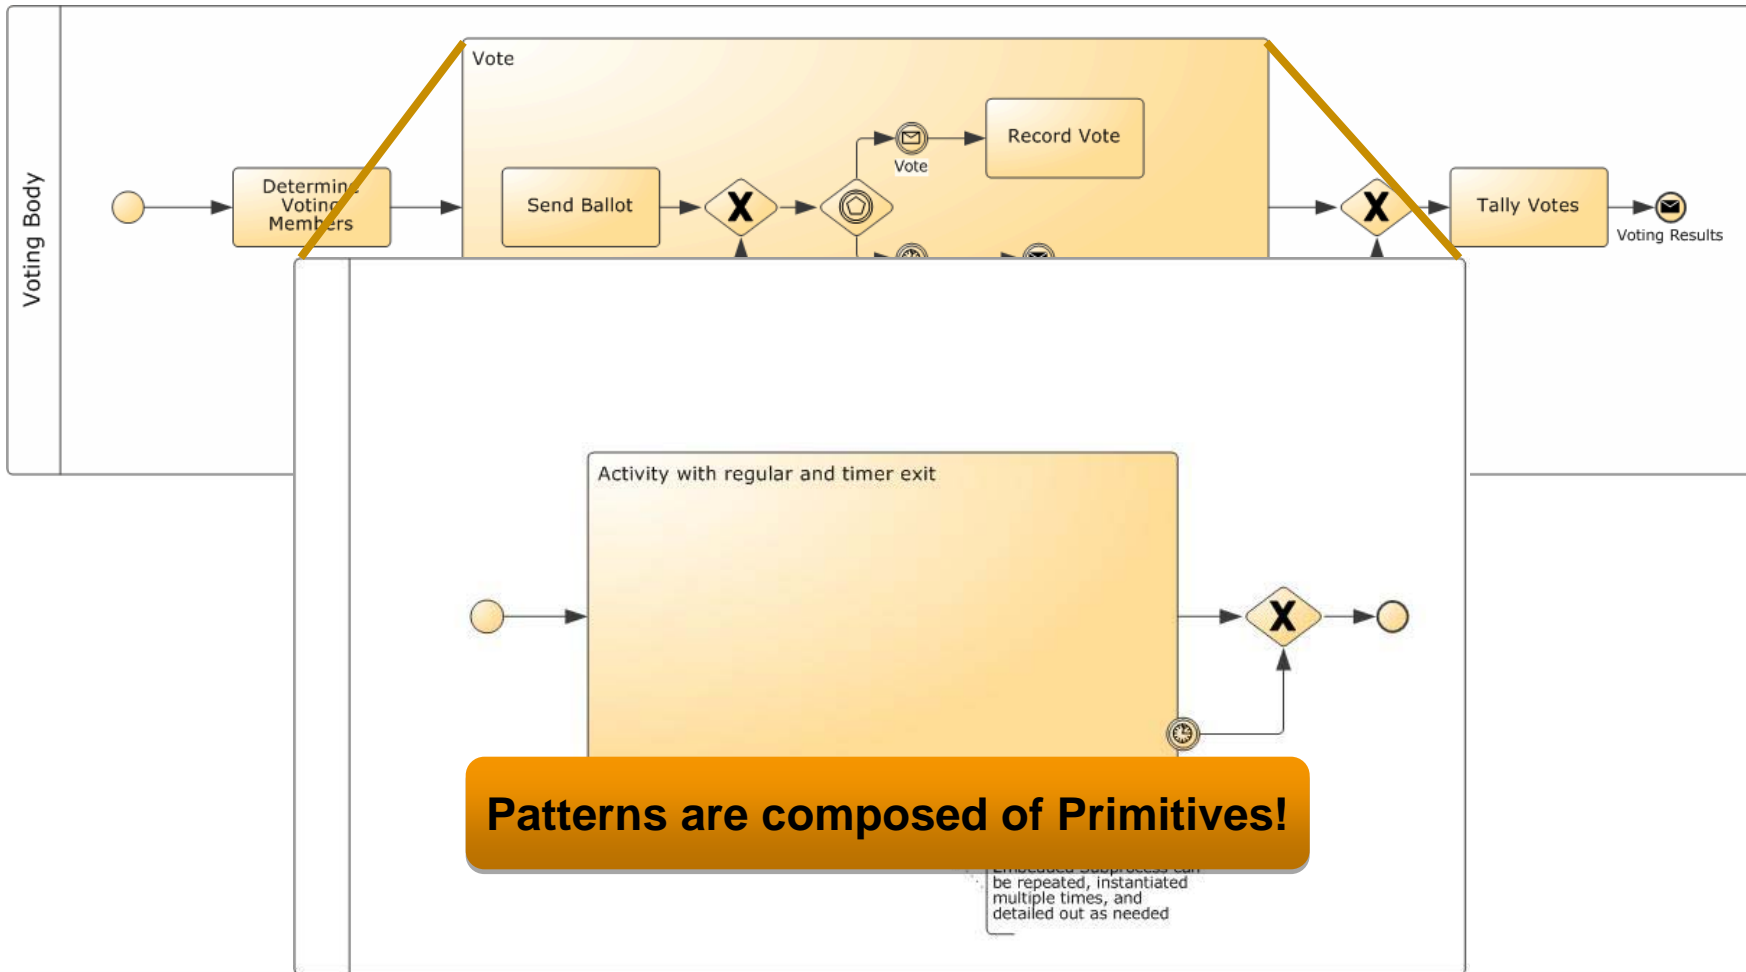

- ▶ Provides basic definitions of the architecture model semantics
- ▶ Provides elementary rules for the connectivity of primitive constructs
- ▶ Provides foundation building blocks for constructing architecture products

- ▶ **Caveat: A common vocabulary by itself does not guarantee high quality products: We need a Styleguide**

Low- and High-Level Patterns

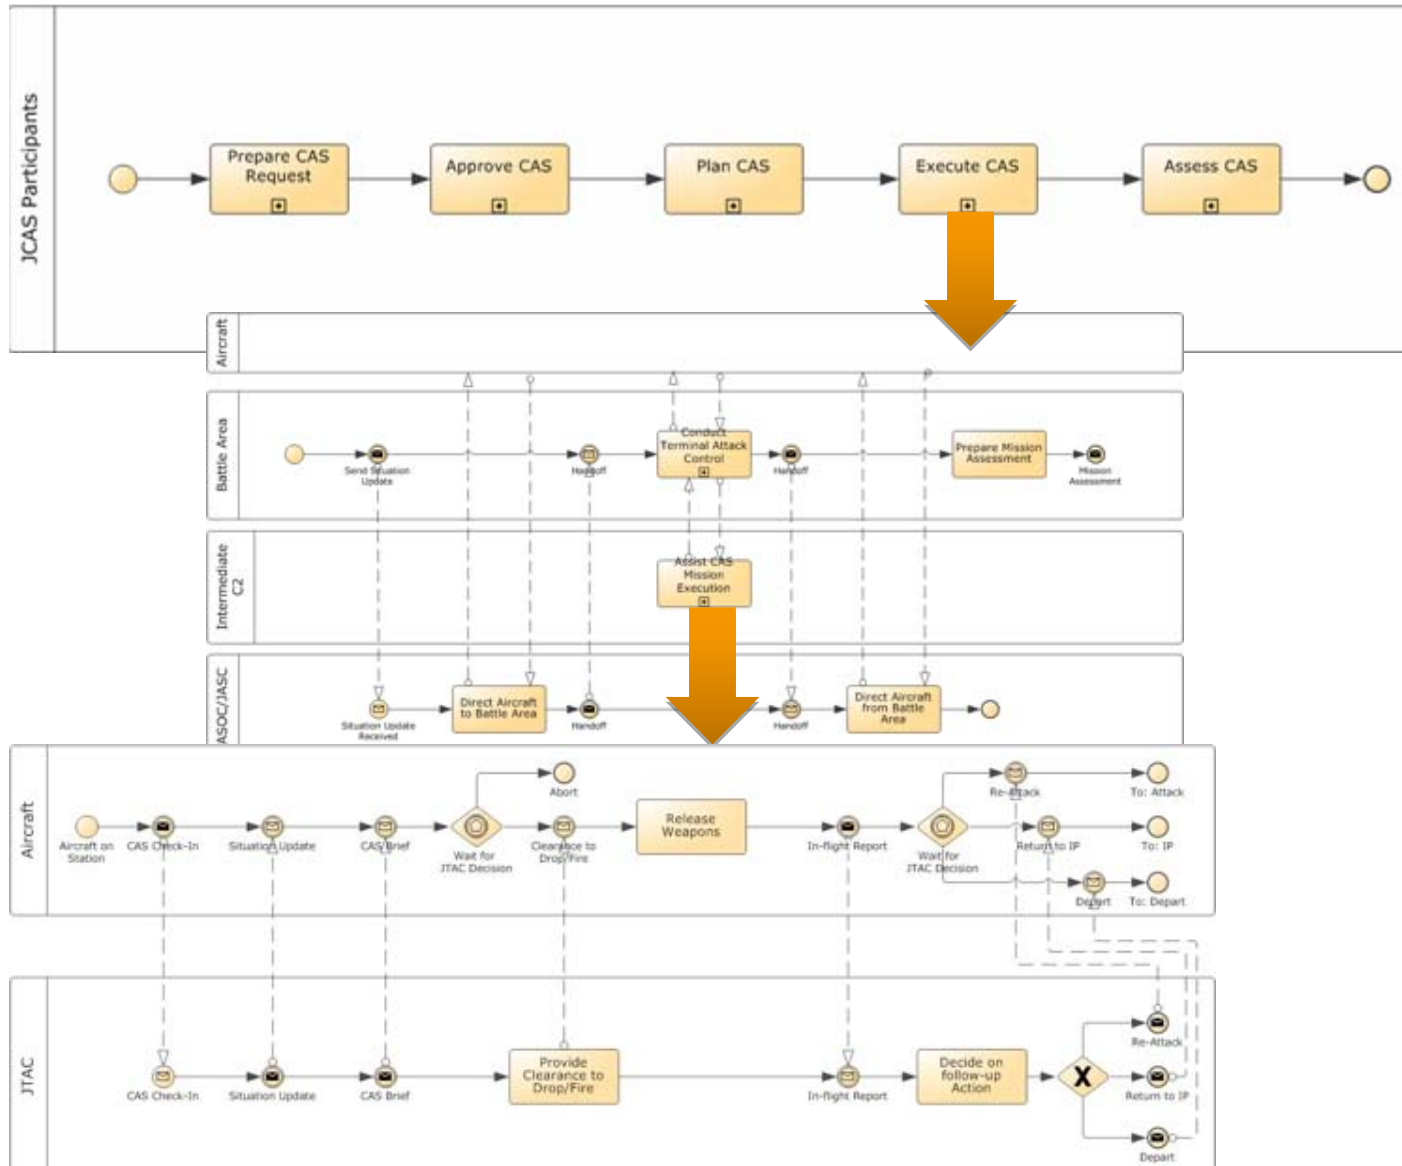

PriMo - Modeling Guide

- ▶ A style guide provides subjective advice that will ensure the design of high quality products
- ▶ A style guide advises on
 - Choice of words
 - Which constructs are appropriate in a given situation
 - Choice of grammar
 - How to combine constructs to maximum effect

Guidelines for Systematic Process Decomposition

Example Application:

Joint Close Air Support

Joint Close Air Support

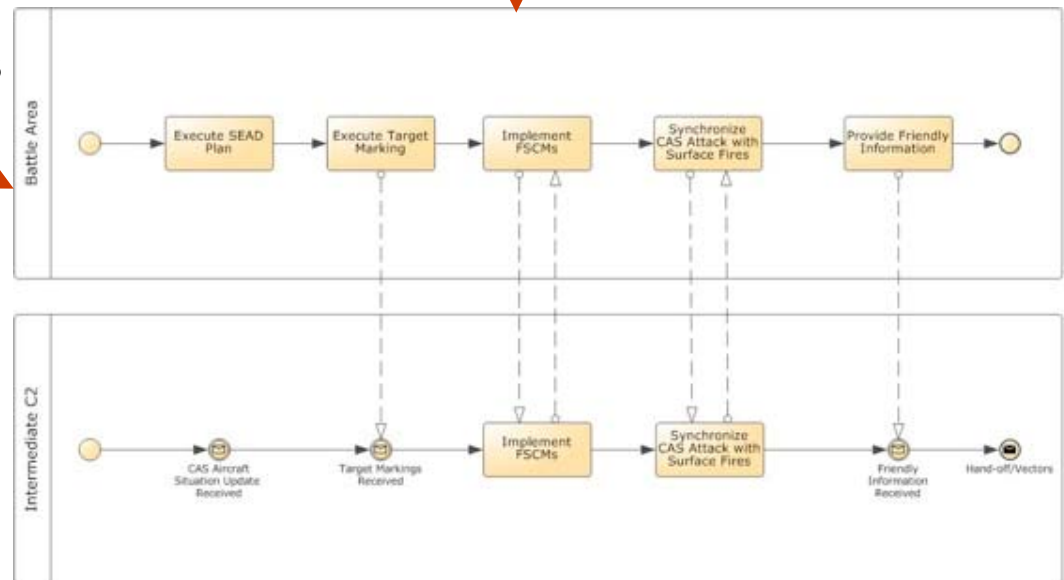

Term	Definition	Acronym	Synonym	Capability	Activity	Resource	Performer	DB-1	DB-2	DB-3	DB-4	DB-5	DB-6	DB-7	DB-8	DB-9	DB-10	DB-11	DB-12	DB-13	DB-14	DB-15	DB-16	DB-17	DB-18	DB-19	DB-20
Terminal Air Controller	Person on the ground guiding the air asset into place during the execution phase of the CAS mission	JTAC																									
Target	Designated effect object																										
Fire Support Control Measure	Activity that marks the spot	FSCM																									
Close Air Support	Ability to provide ground troops with air cover	CAS																									
Battle Damage Assessment	Report about effects of CAS mission	BDA																									
CAS Request	Message containing details about desired CAS mission																										
Intermediate Command and Control Post	Officer in the field	Intermediate C2

Audit Trail & Stream – Real-time & Historic

Summary

- ▶ **Enterprise Architecture is about Interoperability and Communication**
- ▶ **Primitives/Lexicon provides guidelines to achieve this**
 - **Minimize Diagram Types: Fewer primitives to learn**
 - **Standardize Patterns: Unified use of modeling language**
 - **Define Vocabulary first: Lexicon ties model types together**
- ▶ **A realistic design standard for modelers, architects, and tool vendors**

Historic Founders of DoD Architecture Primitives Project

Team Members (Back to Front and Left to Right) taken on 05/01/2008: Dennis Wisnosky (OSD/OBT), COL Loretta Reynolds (JCS), COL Elizabeth Bierden (JCS), Brian Wilczynski (DoD OSD/NII) LtCol Jonathan Sutherland (JCS), Ron Bechtold (ARMY), Paul Ketrick (BTA/EP&I), Deedee Akeo (BTA/EP&I)
